Quality and Safety Strategy Improvement (Care Pathways)

Workshop Pack

2<sup>nd</sup> September 2022

Use the panel on the left to access annotation tools, such as "stickynote"

Interactive Feedback Session

## **SWOT – Improving Care Pathways**

**NHS Foundation Trust** 

We have good insight into our care pathways and emerging themes for improvement

We are data

utilise this

more

NACEL audit bench marking audit for end of life care

Strengths

We participate in national data and benchmarking such as model hospital/GIRFT We have a structure of capturing information but this is not being utilised to its full potential

No trust-wide forum for monitoring care pathways that span across the organisation such as Sepsis

Weaknesses

Threats

The data retrieved from benchmarking is not given enough co-ordination to learn from this

Regional groups are in place but stay at the speciality level rich and could

Identifying and prioritising care pathways for improvement and learning from the areas where we are celebrating success

Use of

tendable

SWOT

central directory of all of the pathways in place?

PDSAs for a small number of pathways that span across specialities and transferring learning to other areas

Different processes across the organisation

oversight of care pathways that span across specialties

Time pressures

Opportunities

**Improving** visibility board to ward

Enhancing visibility of areas for improvement

celebrating success

Culture needs to be based on trust

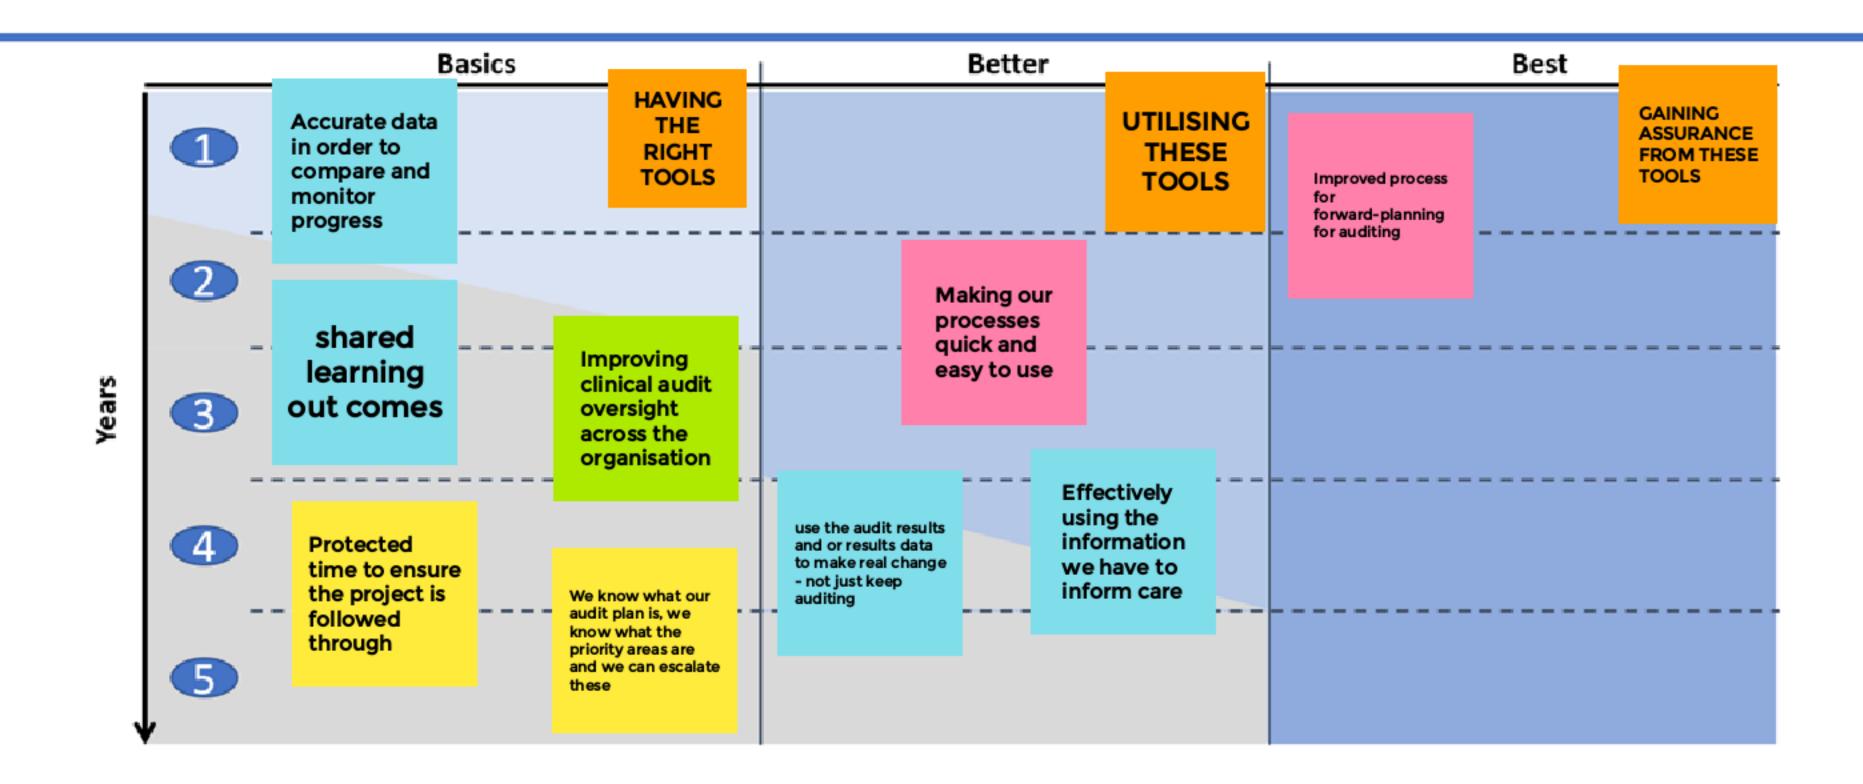

Adding on additional meetings to make space for this

How do we priorities the pathways that need the focus?

## Safe and efficient care

Wirral University
Teaching Hospital

How can we ensure care is progressively safer and harm-free? How can we ensure care is clinically effective and highly reliable?

## Sustaining quality and safety

Wirral University
Teaching Hospital

How can we improve feedback from stakeholders including patients, carers and regulators?

How can we reduce variation in care pathways to improve outcomes?

How can we sustain improvement?
